

Check Inn Bag just like it sounds – travel without boarders!

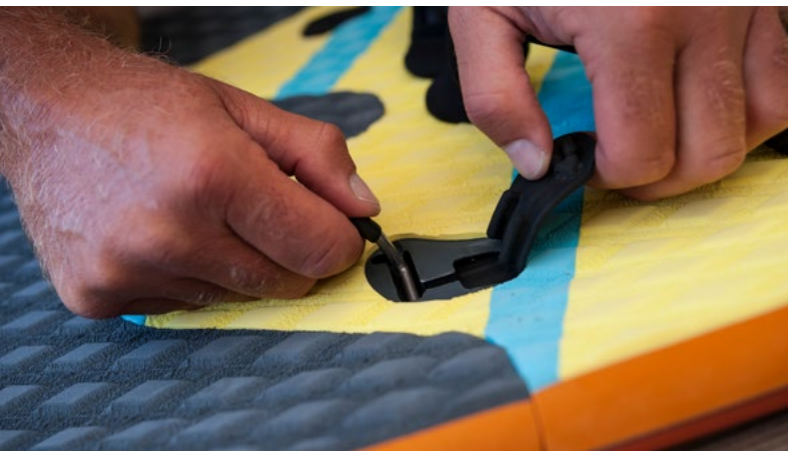

In new Nobile Check Inn Bag you can pack: Nobile Zen Hydrofoil, Infinity Split Foil 5'1", two kites, bars, pump, wetsuits, as well as you favourite T-shirts.

You can easily connect Infinity Foil splitboard in few seconds

Third generation of the W-Connection patented solution. In 2017 we reduced weight, improved stiffness and durability.

This generation of the improved W-Connection has been redesigned from scratch.

The fuselage is made of aluminium-carbon used in aviation industry.

It's a pivotal point of the whole construction, connecting the hydrofoil with the board. Made of high-quality aluminum to make it super-stable and maximally durable.

Easy mount mast to platform with 4 screws. Mounting spacing: 165x90 mm.

The aluminium mast is extruded from the material used in the aviation industry. It is extremely light and stiff to the maximum. Thanks to the non-drag profile, it has very low resistance in the water (mount with 2 screws)

Wings are built of ultra-durable and stiff G10 composite milled with the use of super-precise CNC machines and polished to minimize the water resistance (mount with 3 screws)

The 40 mm Nobile fin is made of G10 material and serves as an extra stabilizer. You can use other sizes of Nobile G10 fins as well.

Wings are extremely stable and easy to control. It gains lift quickly which makes it useful also for the beginners.
